

Table of Contents

Keynote

| | |
|--|---|
| Exploring Extremism and Terrorism on the Web: The Dark Web Project | 1 |
| <i>Hsinchun Chen</i> | |

Long Papers

Crime Analysis

| | |
|--|----|
| Analyzing and Visualizing Gray Web Forum Structure | 21 |
| <i>Christopher C. Yang, Torbun D. Ng, Jau-Hwang Wang, Chih-Ping Wei, and Hsinchun Chen</i> | |
| An Empirical Analysis of Online Gaming Crime Characteristics from 2002 to 2004 | 34 |
| <i>Yungchang Ku, Ying-Chieh Chen, Kuo-Ching Wu, and Chaochang Chiu</i> | |
| Detecting Cyber Security Threats in Weblogs Using Probabilistic Models | 46 |
| <i>Flora S. Tsai and Kap Luk Chan</i> | |

Emergency Response and Surveillance

| | |
|--|----|
| What-if Emergency Management System: A Generalized Voronoi Diagram Approach | 58 |
| <i>Ickjai Lee, Reece Pershouse, Peter Phillips, and Chris Christensen</i> | |
| Agent Based Framework for Emergency Rescue and Assistance Planning | 70 |
| <i>Yujun Zheng, Jinquan Wang, and Jinyun Xue</i> | |
| Object Tracking with Self-updating Tracking Window | 82 |
| <i>Huimin Qian, Yaobin Mao, Jason Geng, and Zhiquan Wang</i> | |
| A Case-Based Evolutionary Group Decision Support Method for Emergency Response | 94 |
| <i>Jidi Zhao, Tao Jin, and Huizhang Shen</i> | |

Intrusion Detection

| | |
|---|-----|
| Lightweight Anomaly Intrusion Detection in Wireless Sensor Networks | 105 |
| <i>Haiguang Chen, Peng Han, Xi Zhou, and Chuanshan Gao</i> | |

| | |
|---|-----|
| ASITL: Adaptive Secure Interoperation Using Trust-Level | 117 |
| <i>Li Jin and Zhengding Lu</i> | |
| A RT0-Based Compliance Checker Model for Automated Trust Negotiation | 129 |
| <i>Zhensong Liao and Hai Jin</i> | |
| TCM-KNN Algorithm for Supervised Network Intrusion Detection | 141 |
| <i>Yang Li, Bin-Xing Fang, Li Guo, and You Chen</i> | |
| Research on Hidden Markov Model for System Call Anomaly Detection | 152 |
| <i>Quan Qian and Mingjun Xin</i> | |
| Network Security | |
| Towards Identifying True Threat from Network Security Data | 160 |
| <i>Zhi-tang Li, Jie Lei, Li Wang, Dong Li, and Yang-ming Ma</i> | |
| Security Assessment for Application Network Services Using Fault Injection | 172 |
| <i>Hyungwoo Kang and Dong Hoon Lee</i> | |
| A Secure Data Transmission Protocol for Mobile Ad Hoc Networks | 184 |
| <i>Shejie Lu, Jun Li, Zhiyuan Liu, and Guohua Cui</i> | |
| Defending DDoS Attacks Using Hidden Markov Models and Cooperative Reinforcement Learning | 196 |
| <i>Xin Xu, Yongqiang Sun, and Zunguo Huang</i> | |
| A Novel Relational Database Watermarking Algorithm | 208 |
| <i>Yu Fu, Cong Jin, and Chuanxiang Ma</i> | |
| Short Papers | |
| Data and Text Mining | |
| Anticipatory Event Detection for Bursty Events | 220 |
| <i>Kuiyu Chang, Qi He, Ridzwan Aminuddin, Ridzwan Suri, and Ee-Peng Lim</i> | |
| Community Detection in Scale-Free Networks Based on Hypergraph Model | 226 |
| <i>Rong Qian, Wei Zhang, and Bingru Yang</i> | |
| The Treelike Assembly Classifier for Pedestrian Detection | 232 |
| <i>C.X. Wei, X.B. Cao, Y.W. Xu, Hong Qiao, and Fei-Yue Wang</i> | |
| Cybercrime and Information Access and Security | |
| A Simple Method to Buyers in Confronting Internet Auction Fraud | 238 |
| <i>Yungchang Ku, Yuchi Chen, and Chaochang Chiu</i> | |

| | |
|--|-----|
| Trends in Computer Crime and Cybercrime Research During the Period 1974-2006: A Bibliometric Approach | 244 |
| <i>Chichao Lu, Wenyuan Jen, and Weiping Chang</i> | |
| The Study of Government Website Information Disclosure in Taiwan . . . | 251 |
| <i>Yuan-Fa Chen, Sandy Yu-Lan Yeh, and Kuo-Ching Wu</i> | |
| Informed Recognition in Software Watermarking | 257 |
| <i>William Zhu</i> | |
| An Inference Control Algorithm for RDF(S) Repository | 262 |
| <i>Jianjiang Lu, Jinpeng Wang, Yafei Zhang, Bo Zhou, Yanhui Li, and Zhuang Miao</i> | |

Intrusion Detection

| | |
|--|-----|
| PPIDS: Privacy Preserving Intrusion Detection System | 269 |
| <i>Hyun-A Park, Dong Hoon Lee, Jong In Lim, and Sang Hyun Cho</i> | |
| Evaluating the Disaster Defense Ability of Information Systems | 275 |
| <i>Baowen Zhang, Jing Zhang, Ning Zhou, and Mingang Chen</i> | |
| Airline Safety Evaluation Based on Fuzzy TOPSIS | 282 |
| <i>Yong Deng, Jia Xiong, and Ping Fu</i> | |

Network Security

| | |
|--|-----|
| A Framework for Proving the Security of Data Transmission Protocols in Sensor Network | 288 |
| <i>Mi Wen, Ling Dong, Yanfei Zheng, and Kefei Chen</i> | |
| Port and Address Hopping for Active Cyber-Defense | 295 |
| <i>Leyi Shi, Chunfu Jia, Shuwang Lü, and Zhenhua Liu</i> | |
| A Hybrid Model for Worm Simulations in a Large Network | 301 |
| <i>Eul Gyu Im, Jung Sik Kim, In Woo Noh, and Hyun Jun Jang</i> | |

Posters

Terrorism Informatics and Crime Analysis

| | |
|---|-----|
| A Web Portal for Terrorism Activities in China | 307 |
| <i>Daniel Zeng, Li Zhang, Donghua Wei, and Fei-Yue Wang</i> | |
| An Overview of Telemarketing Fraud Problems and Countermeasures in Taiwan | 309 |
| <i>Jau-Hwang Wang, Jiing-Long Jow, You-Lu Liao, Tyan-muh Tsai, and Garfield Hung</i> | |
| Mining the Core Member of Terrorist Crime Group Based on Social Network Analysis | 311 |
| <i>Qihong Liu, Changjie Tang, Shaojie Qiao, Qiwei Liu, and Fenlian Wen</i> | |

| | |
|--|-----|
| Providing Personalized Services for HWME System by Item-Based Collaborative Filtering | 314 |
| <i>Qiudan Li, Yaodong Li, Huiguang He, Guanggang Geng, Yuanping Zhu, and Chunheng Wang</i> | |
| Network Security and Intrusion Detection | |
| An Intelligent Agent-Oriented System for Integrating Network Security Devices and Handling Large Amount of Security Events | 316 |
| <i>Yang-ming Ma, Zhi-tang Li, Jie Lei, Li Wang, and Dong Li</i> | |
| Link Analysis-Based Detection of Anomalous Communication Patterns | 318 |
| <i>Daniel Zeng and Zan Huang</i> | |
| Social Modeling and Reasoning for Security Informatics | 321 |
| <i>Wenji Mao, Daniel Zeng, Li Zhang, Donghua Wei, and Fei-Yue Wang</i> | |
| Detecting Botnets by Analyzing DNS Traffic | 323 |
| <i>Hao Tu, Zhi-tang Li, and Bin Liu</i> | |
| HMM-Based Approach for Evaluating Risk Propagation | 325 |
| <i>Young-Gab Kim and Jong In Lim</i> | |
| A Symptom-Based Taxonomy for an Early Detection of Network Attacks | 327 |
| <i>Ki-Yoon Kim and Hyoung-Kee Choi</i> | |
| Author Index | 329 |
